College Student

A 6th-semester Information Systems student with proven experience in fullstack web development, including an internship at a government institution (Kementerian Kelautan dan Perikanan RI) where I built and integrated responsive web applications and REST APIs using Next.js, TypeScript, and Node.js. Proficient across the full stack from React and Tailwind CSS on the frontend to Express, Golang, and databases such as MySQL, PostgreSQL, and MongoDB on the backend.

WORK EXPERIENCE

Lembaga Pengembangan Komputer Supervisor

September 2024 - Present

- Supervise practitioners related to discipline and presence to make a decision.
- Guiding practitioners by ensuring understanding of concepts and skills.
- Supervise and provide appropriate guidance and direction during the practicum.

Kementerian Kelautan dan Perikanan Frontend & Backend Developer Intern

August 2025 - October 2025

- Developed responsive web applications using Next.js, TypeScript, and Tailwind CSS.
- Built and integrated REST APIs with backend services.
- Collaborated with team members to deliver scalable and maintainable solutions.
- Conducted usability testing to improve user experience and accessibility.

Dicoding

PROJECTS

Sistem Informasi KKP

August 2025 - September 2025

Kementerian Kelautan dan Perikanan

A government data visualization system that allows staff to upload Excel files and automatically render them as interactive charts, replacing manual data processing and supporting data-driven decision making at Kementerian Kelautan dan Perikanan RI.

PDF – AI

February 2026 – March 2026

Self-Initiated

An AI-powered chatbot that allows users to upload PDF documents and interact with them through natural conversation – asking questions, extracting insights, and summarizing content using large language models.

Indra Farma

April 2026 – May 2026

Gunadarma University

A pharmacy inventory management system built for Toko Obat Mantri Indra, designed to track and manage medicine stock in and out, monitor sales transactions, and provide real-time insights into product availability and performance.

Lea Juice App

October 2025 – January 2026

Gunadarma University

A full-stack e-commerce platform for fresh juice and salad products, featuring product browsing, order processing, user authentication, and an admin dashboard for managing orders, listings, and inventory.
